

The figure is a scatter plot on a grid, likely representing a celestial map. The grid consists of solid black lines forming a 4x4 square pattern, with dashed black lines forming a finer 8x8 grid. A central black star is located at the intersection of the third vertical line from the left and the fourth horizontal line from the bottom. Surrounding the star are several celestial objects: a red elliptical galaxy to the upper right, an orange elongated galaxy to the lower right, a small orange circle to the upper left, a small black dot to the lower left, a blue dot to the lower left, and a small black diamond to the upper right. A large, elongated orange galaxy is also visible in the lower right corner.
